Ball Mill's - Two Examples of Disposition

Offer number:	A-190307-2019-01
Year of construction:	Different years
Brand:	Different
Model:	Different
Capacity:	Different

Background

We are able to offer different used ceramic ball mills which can be useful in mining factories. As sample description we are offering here two data sheets - in case of interest we can detail the description and arrange a visit to inspect the machine.

1st Example - ICF Mill

- Ball mill in continuous ICF brand
- With transmission by belts, motor - power of 275 kW
- Measures of 2,6 m diameter x 7,3 m useful length.
- Bearings by liquid bushing and silica coating (this can be replaced by alumina, rubber or manganese as appropriate)
- Consists of transmission, electrical panel, motor, and legs
- It can be complemented with a 3 m IANUA S3.0 dynamic separator
- Capacity of 35,000 Ltrs

2nd Exmple Molino Loro & Parissini

- Loro & Parissini continuous ball mill
- With mechanical transmission - 270 kW motor power
- Measures of 2,6 m diameter x 6 m useful length.
- Bearings by liquid bushing and silica coating (this can be replaced by alumina, rubber or manganese as appropriate).
- It consists of transmission, crown, attack pinion and engine
- Capacity 26,000 Ltrs

Status:

- Machines are in good conditions
- Ex site in Spain

Machines in good conditions!
Sales prices on demand!
